DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, and 18-23, drawn to a bag with support arms, classified in class 224, subclass 628.
 - II. Claims 13-17, drawn to a bag with shoulders straps, classified in class 224, subclass 578.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are not related. Group I is directed to spaced apart arms and specific to spaced apart arm while group II is directed to the shoulder suspension system. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the inventions as claimed are each having a different design, mode of operation. There is no common between the two groups.
3. To the degree it is argued that the two groups are not related. Inventions I and II can be related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, each subcombination has separate utility such as, the invention of group I can be used as a single strap on various types of container instead of on a bag. The invention of Group II can be used as separate utility such as handlebars on a towing bag. See MPEP § 806.05(d).

4. To the degree applicant elects group I as set forth above, the above claims are directed to the following patentably distinct species:

Group a: the handle shown in Fig. 4,

Group b: the handle shown in Fig. 9,

Group c: the handle shown in Fig. 11-12,

Group c: the handle shown in Fig. 13-14.

The species are independent or distinct because each handle has its specificities patentably distinct from the other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1, and 18 are generic to the handle group.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3727

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
